Join us in modern and dynamic Leipzig to enhance your knowledge of autoimmunology with the world’s top experts. The 10th International Congress on Autoimmunity is the only meeting where you can learn about more than 80 autoimmune diseases from a variety of perspectives, both research-based and clinical. In Leipzig in 2016, we will discuss the newest therapeutic techniques and diagnostic
tools as well as the most up-to-date research on genetic, etiology, diagnostic, clinical aspects and novel therapies of autoimmune diseases. Established by Professor Yehuda Shoenfeld, the congress constitutes a network of international leaders on immunology, rheumatology and related fields, all of whom contribute their unique and diverse knowledge to the “family of autoimmunity.” We look forward to seeing you in Leipzig on April 6-10, 2016!
